African Violets -- Unusual House Plants
Spring 1957 List.

All plants are state inspected and shipped in pots. Small plants are about 2½ and 3 inches tall. These ship best and keep on growing. Give other varieties in which you are interested, if plants are smaller than usual I include an extra plant or a larger size. Cut leaf orders are packed in plastic envelopes and sent by first class mail. Leaves rooted in Magic Mix, rolled and packed in Air Wrap. In all plant orders of \$10.00 or over (no supplies) I will include extra plants or cuttings or both.

Many other varieties are available in too small quantities to list. Ask about any others you are interested in. Any questions on varieties will be answered if stamp is enclosed. Substitutions will be made unless instructions are to the contrary.

I have new varieties from Lyons, Richters, and Brewers, also many smaller hybridizers. These will be ready in June, also a new list of Rex and Fibrous Begonias. Achimenes, Impatiens and other plants. I have a tremendous supply of large cuttings, and especially welcome both dealers and collectors to my home. A discount of 10% will be allowed on \$10.00 orders at my home. Please make an appointment when coming from a distance. I live 5 miles West of Freeport (Rte. 20) to Club Esquire, turn North, one-fourth mile.

Your order automatically puts your name on the mailing list for the following year. Every order must be accompanied by a mailing fee of 75¢ for insured parcel post or \$1.00 for Special Handling. State which you prefer. All leaf orders must include the 75¢ mailing fee. No orders sent without the mailing fee.

African Violets

Small Plants .75¢ Larger \$1.00 and \$1.50 Leaves .25¢
Rooted leaves .40¢ Potted in Magic Mix. 50¢ unless marked otherwise.

RECEIVED

MAGIC MIX--a prepared mix for starting gloxinia, begonia, episcia, violet or any plant cutting, a fine medium for starting seed. It contains no soil or chemical fertilizers. It can be used alone or combined with equal parts of violet soil for growing and blooming large specimen plants. If you prefer to root cuttings in water they can be transferred to this mix without shock.

Magic Mix should always be moist, not wet when used. Press mix firmly into container, plant cuttings, water thoroughly firming mix around cuttings. When dividing cuttings always water thoroughly, cutting can then be easily divided without injury to roots.

Atlas Fish Emulsion is recommended as fertilizer.
